

## SMART SOLUTIONS

Our client works with companies around the globe to deliver smart technology solutions to diverse business requirements requiring strategy, marketing, technology and/or analytics expertise. As a result of their fast growth rate (nearly 30% annually) and the ever changing technology landscape, this organization has turned to Bagg Technology Resources for many project requirements.

### + TOP QUALIFIED RESOURCES

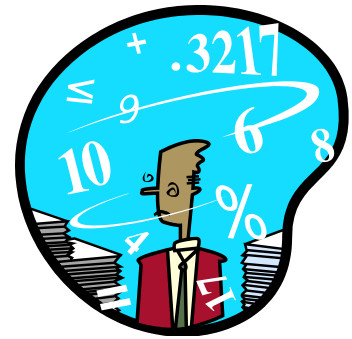

One such well-qualified Consultant that BTR provided has participated in multiple projects, with his contract being extended several times. We provided a bilingual resource with over 20 years of experience in delivering IT solutions, most often as a Solutions or Enterprise Architect, overseeing architectural decisions, coding standards, and design patterns used by his clients. As a senior resource, he provides advice on business and technology strategy. Having successfully worked with this resource on other projects, we decided he would be a good fit for what this client BTR's successful resource is a Microsoft Virtual Technology Specialist for SharePoint and a Virtual Partner Technology Advisor for Microsoft Dynamics CRM.

### + SUCCESSFULLY COMPLETED PROJECTS = INCREASED REVENUE AND PROFIT FOR OUR CLIENT

Some of the contract projects successfully completed by BTR's Resource for this client include:

#### Examination Working Paper System for a Financial Institution

- Conducted stakeholder interviews
- Designed high level architecture and roadmap for examination working paper and member management systems using SharePoint 2013, SkyDrive Pro, MS Dynamics CRM 2013 and InfoPath 2013,
- Reviewed over 10 competitive commercial off-the-shelf audit management products and performed total cost of ownership analysis and gap fit analysis to identify best fit.

#### Enforcement Case Management System for Regulatory Organization

- Conducted requirements gathering workshops; designed, architected and developed a case management system using MS Dynamics CRM 2011 and SharePoint 2010 for evidence management.
- Created custom tagging component to allow users to apply social tags to any elements in CRM.
- Implemented SDLC process leveraging Team Foundation Server 2012 and Visual Studio 2012
- Installed and configured MS CRM 2013; converted solution and deployed to MS CRM 2013

#### Information Security Intranet for Regulatory Org.

- Designed and developed an intranet site for corporate Information Security group using SharePoint 2010, creating both English and French versions and configuring translation workflows, as a first step to allow the client to develop a complete intranet on SharePoint 2013.
- Created InfoPath 2013 online form and associated workflows to allow users to submit security incidents.
